Animal Fact:
Tigers are extremely territorial but also very social animals!
Overview 🐍

1. What is the internet?
2. What is HTTP?
3. What’s a REST API?
4. What’s Flask?
What is the internet?
A global network of computers communicating with one another.
How do they communicate?
Over certain “protocols”, like HTTP.
What’s HTTP?

Hyper Text Transfer Protocol defines how (lots of) internet messages are formatted and transported.
What’s a REST API?
A service that communicates with other programs over HTTP.
Let’s write code!
Introducing: Flask

- Micro-web framework (very minimalist)
- Used by Pinterest, LinkedIn, Penn Labs etc.
- Template rendering engine
- Simple to use and fun!
See you next week!
